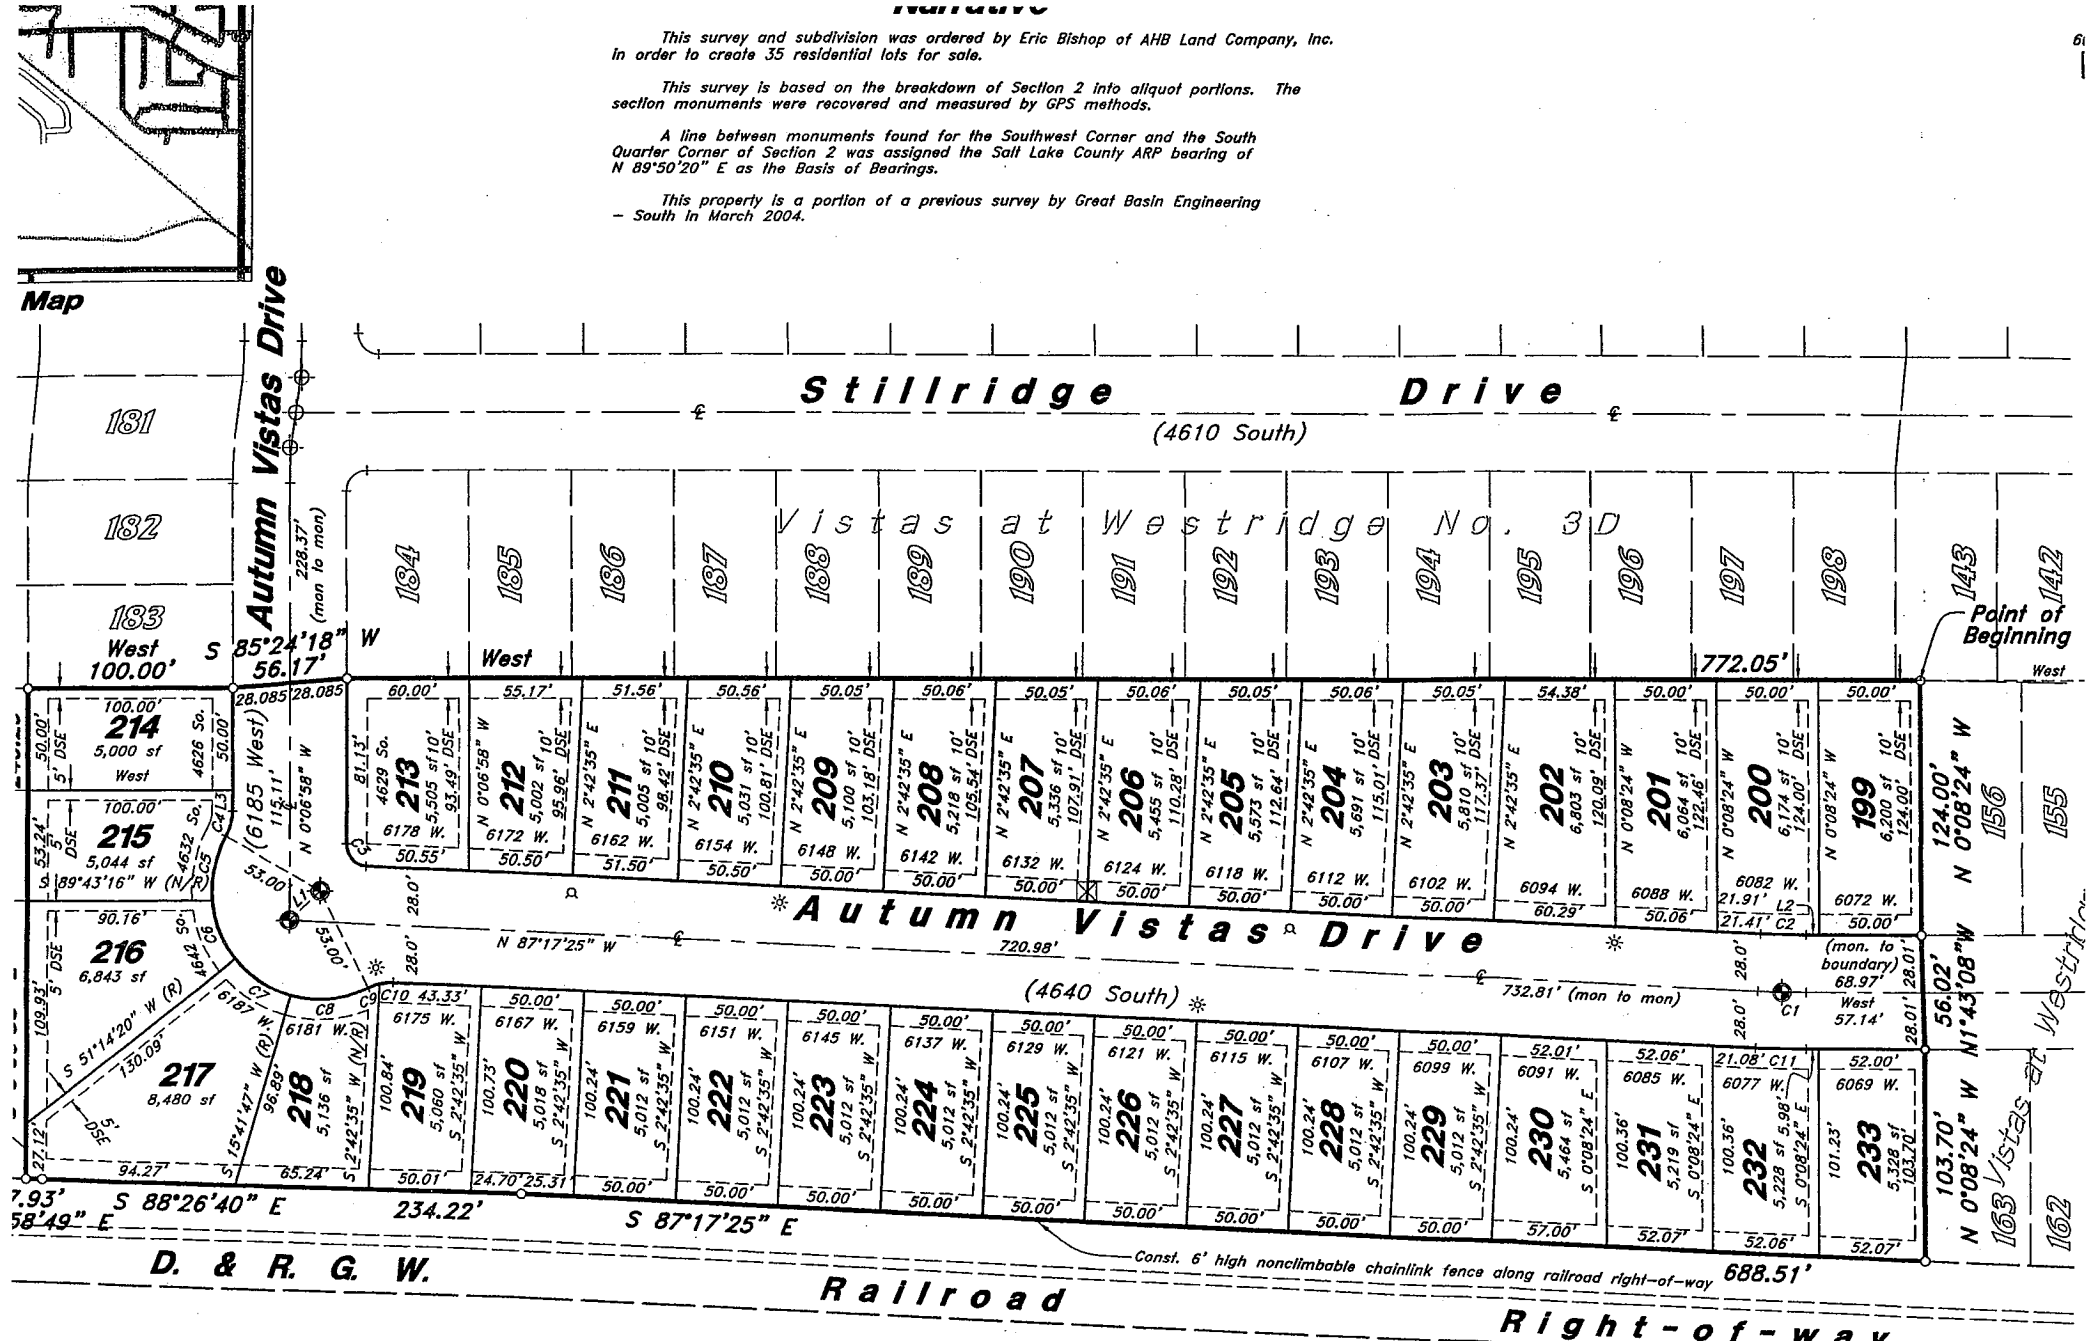
## Narrative

This survey and subdivision was ordered by Eric Bishop of AHB Land Company, Inc. in order to create 35 residential lots for sale.

This survey is based on the breakdown of Section 2 into aliquot portions. The section monuments were recovered and measured by GPS methods.

A line between monuments found for the Southwest Corner and the South Quarter Corner of Section 2 was assigned the Salt Lake County ARP bearing of N 89°50'20" E as the Basis of Bearings.


This property is a portion of a previous survey by Great Basin Engineering – South in March 2004.
