ISSUE:

Execute Interlocal Agreement between Salt Lake County and West Valley City – 7200 West 3900 South Bridge

SYNOPSIS:

An interlocal agreement to define cost sharing on the reconstruction of the bridge on 7200 West at the Utah and Salt Lake Canal.

BACKGROUND:

The 7200 West bridge over the Utah and Salt Lake Canal, built in the late 1970s is in very poor condition, and currently has load restrictions to prevent further damage. West Valley City and Salt Lake County sought and obtained nearly \$1,000,000 in federal funds from the Surface Transportation Program (STP) to reconstruct the bridge. The STP funds are programmed for availability in 2020, but the bridge needs to be replaced immediately. Because of the urgent need for replacement, the Wasatch Front Regional Council (WFRC) and UDOT have been extremely cooperative in finding an early construction solution. WFRC will be able to move funding into next year, and UDOT Structures has agreed to loan the project money until the federal funds become available. This will enable the city and county to begin design immediately. These accommodations will enable the bridge to be constructed as early as spring of 2016.

This agreement defines cost sharing arrangements between Salt Lake County and West Valley City. Execution of this agreement will enable the county to reimburse the city for work in preparing the environmental document and other items completed prior to the receipt of federal funds. Salt Lake County will execute the Federal Aid Agreement, and through this agreement, the City and County will agree to pay matching funds on the project. It is estimated that matching funds will not exceed \$60,000, and this resolution authorizes the payment of these funds.

RECOMMENDATION:

Execute the Interlocal Agreement with Salt Lake County.
